

09

Anti-Nuclear Proliferation Policies:

Nuclear technology constitutes an unacceptable risk to human development. Whether for civil or military use, it must be limited to laboratory-scale experiments. In all cases, the technology must be strictly controlled and regulated to avoid worldwide proliferation. Globwatch investigates: <http://www.globwatch.com/index.php?id=294>

Israelo-Palestinian Peace:

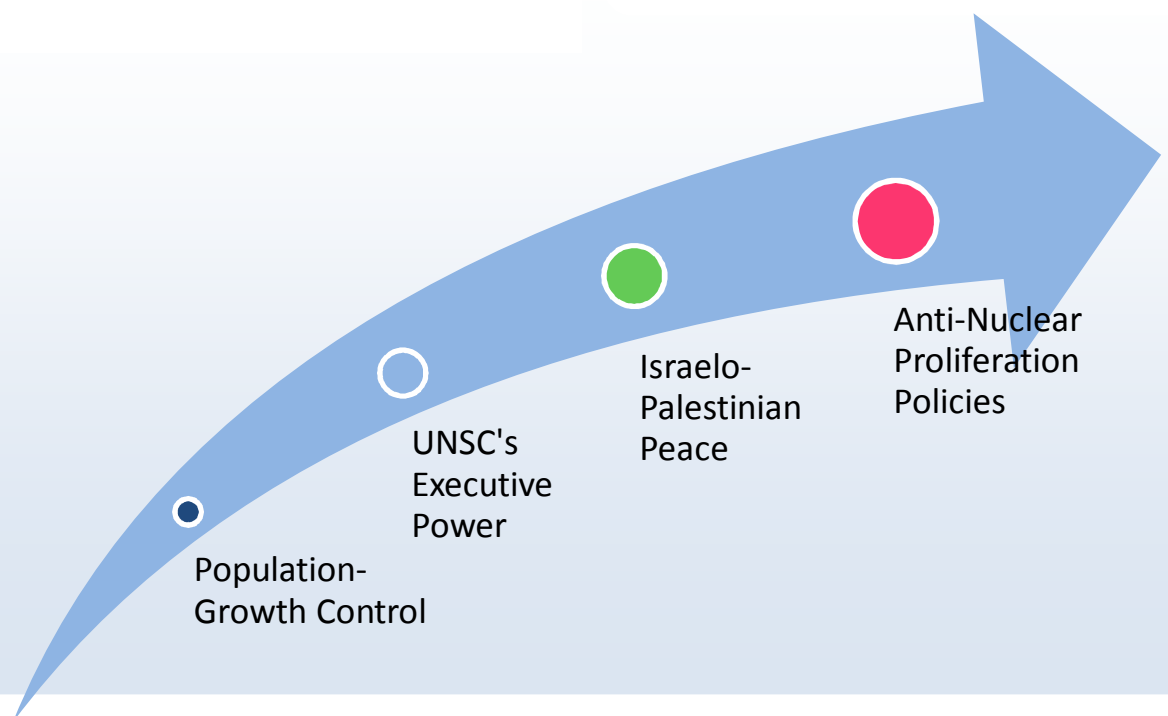

Israel is of utmost human strategic-importance. It is the key to modernity, the meeting point of civilizations. Everything should be engaged to secure its existence and allow a peaceful cohabitation of multi-cultural people and distinct civilizations. Globwatch investigates: <http://www.globwatch.com/index.php?id=292>

Population-Growth Control:

World-population growth must be regulated by law, as natural resources are limited and the underlying causes of demographic changes unpredictable. Population growth is a major source of economic, environmental and social instability in the world. Globwatch investigates: <http://www.globwatch.com/index.php?id=295>
